*"One of the most consistent findings about the power of feedback is the remarkable variability of effects" (p.3)*

4

*"That students are taught to receive, interpret and use the feedback provided is probably more important than focusing on how much feedback is provided by the teacher, as feedback given but not heard is of little use"*

Hattie & Clarke (2018, p. 5)

Significant increase in  
'feedback accountability':  
a belief that it is one's  
responsibility to act upon  
feedback

Significant increase in  
'feedback self-  
efficacy': a belief that  
one possesses the  
skills needed to act  
upon feedback

# Making sense of feedback

On average, only 3/20 comments recalled after a short delay

## Evaluative Recall Bias

People recalled 47% more evaluative feedback than directive feedback

## Evaluative Retrieval Style

All comments tend to be recalled as evaluative, regardless of how they were presented

## Implementing feedback

**“Pupils are unlikely to benefit from marking unless some time is set aside to enable pupils to consider and respond to marking.”**

## 03 | A LEARNING-FOCUSED FEEDBACK CULTURE NEEDS TO BE NURTURED

20

### FEEDBACK DESIGN

Design decisions are driven by a rationale relating to students' learning

Design decisions are driven by what students, rather than teachers, do

Design decisions focus on connectivity of learning across tasks

Students are involved in design decisions

### FEEDBACK PRACTICE & PURPOSE

Feedback processes focus on enhancing students' learning rather than the transmission of information

Opportunities for dialogue are embedded within feedback processes

Students have the opportunity to develop skills for using feedback effectively

### DEVELOPMENT & EVALUATION OF FEEDBACK PROCESSES

Staff are recognised for good practice in developing feedback processes

Developments to feedback processes are informed by evidence and research

Staff training supports the development of effective feedback processes

The development of feedback processes has an enhancement rather than assurance focus

Winstone (forthcoming, 2022)

## What do we want feedback to be?

A burden on our time

OR

the part of our job where we make learning happen?

A judgment on a piece of work

OR

guidance for the future?

A one-off comment

OR

an ongoing conversation?

A process that only teachers can do

OR

a process that students are equally qualified to do?

A process with the potential to be powerful

OR

a process with visible impact?
